INDEX SUMS (KAKURASU)

The goal of the puzzle is to shade some cells in the grid black using the 'weight' sum clues.

The 'weight' of a cell in the Kakurasu grid is a number from 1 to n and is given on the right side and bottom for cells in rows and columns, respectively.

The numbers on the top and left side are the sums of the weights of black cells in the corresponding columns and rows, respectively.
