

## AQRE

Shade some cells black such that all black cells form one orthogonally connected area.

A numbered cell indicates how many cells in the region must be shaded black. In regions without a number, any amount of cells may be black (all cells may also be unshaded).

There cannot be more than three adjacent black or white cells in the grid.

2		1			1		1
2	4				3		
	0						
3							2
3	1				3	2	
2	1		1				0
	1				0
