

## AQRE

Shade some cells black such that all black cells form one orthogonally connected area.

A numbered cell indicates how many cells in the region must be shaded black. In regions without a number, any amount of cells may be black (all cells may also be unshaded).

There cannot be more than three adjacent black or white cells in the grid.

5	5				6				2
					5				
2		4					1	1	
	6				2	2			
	2							3	
3			1				2		
		2				2		1	
3				2					2
