ILLUSTRATION

The task is to shade some cells black.

A number in a white (black) cell represents the number of empty white (black) cells that can be seen from that cell (excluding itself from the count) until it encounters a black (white) cell or another numbered cell or the edge of the grid.

Note: A cell can be seen by another cell if they are in the same row or column. The color of numbered cells cannot be changed.

2		2	1		2		
	3		3				2
2		3		1	4		1
	4		2			1	
				2			2
2		2	0		3	1	
2		1		2		3	
	1		1		3		2
