SASHIKAKU

The puzzle grid contains numbers in some cells.

The aim is to divide the grid into rectangular and square regions such that each region contains exactly one given number.

A given number represents the difference between the width and height of the region to which it belongs.

				4			
					1		
	1	3		3		1	
2			3				4
						0	
			1				0
