ILLUSTRATION

The task is to shade some cells black.

A number in a white (black) cell represents the number of empty white (black) cells that can be seen from that cell (excluding itself from the count) until it encounters a black (white) cell or another numbered cell or the edge of the grid.

Note: A cell can be seen by another cell if they are in the same row or column. The color of numbered cells cannot be changed.

6			2	1	1		
					8		
	2	1		3		4	
			3				0
		6					
4	4			3		1	
							3
1		2			2	1	0
