

AQRE

Shade some cells black such that all black cells form one orthogonally connected area.

A numbered cell indicates how many cells in the region must be shaded black. In regions without a number, any amount of cells may be black (all cells may also be unshaded).

There cannot be more than three adjacent black or white cells in the grid.

0		1		1	0	1	1		
4						2		1	
							2		
				0			2		1
3				2		2			
				2				1	
					5				1
