## SIGN IN

Fill in each cell of the grid with numbers from 1 to 5 such that no number repeats in any row or column.

If the absolute difference between two digits in neighbouring cells is 1, then they are separated by a "+" or "-" sign.

The "+" sign indicates that the digit in the left cell or upper cell is one <u>less</u> than the digit in the right cell or lower cell. The "-" sign indicates that the digit in the left cell or upper cell is one <u>more</u> than the digit in the right cell or lower cell.

All instances of consecutive digits are shown by these signs.
