HIDATO

The goal is to fill the grid with consecutive numbers that connect horizontally, vertically, or diagonally.

In every puzzle, the smallest and the highest numbers are given in the grid. The other numbers are given to ensure that the puzzle has only a single solution.

	24		19						37
			29				35		
100	21								
	99			16	11				
						6			2
	97				89		47		1
	73			85			81		50
71				87			79	51	
	63		68				57		
65		67			77			56
