

## ROSSINI SUDOKU

Fill numbers 1–9 in the empty spaces of the 9×9 grid such that they appear exactly once in each row, column, and 3×3 square.

Arrows outside the grid indicate that the nearest three digits in the corresponding direction are in either ascending or descending order – the highest number is always in the direction of the arrow.

All possible arrows are given, so if there is no arrow, the first three digits do not form an increasing sequence in either direction.
