

LINE SEGMENT

The task is to draw line segments that pass through exactly three or four consecutive cells.

The line segments can only be horizontal (H), vertical (V), or diagonal (D).

Each cell must be visited exactly once.

A cell with a letter must contain a line segment with that orientation.

					H				
				D				D	
	V								
		D		H			D		
		V							D
V				H					
		V						H	
	V								H
