

AQRE

Shade some cells black such that all black cells form one orthogonally connected area.

A numbered cell indicates how many cells in the region must be shaded black. In regions without a number, any amount of cells may be black (all cells may also be unshaded).

There cannot be more than three adjacent black or white cells in the grid.

1		2	3			1			
1						1		1	
4				0	3			2	
				1				4	
		3			1				
					1	1	2		
			1	3					
					4				2
