

SQUARE JAM

Divide the grid into square regions. A cell with a number indicates the side length of the region to which it belongs.

A region may contain any amount of numbered cells and there may be regions without a number.

No grid dot should be shared by the corners of four regions.

	4			4					3
		4			2				
				4		2			
1									2
							3		
				2					2
								2	
							2		
3				3		2			2
