

# AKARI

Light up the entire grid by placing lightbulbs in the white cells.

A bulb sends rays of light horizontally and vertically, illuminating its row and column unless blocked by a black cell. A numbered black cell indicates the number of bulbs in cells adjacent to its four sides.

No two bulbs can shine on each other.

Black				Black	1				
Black	2	1			Black	2		Black	
			1		1				
		0	0						0
	1						0		0
		0				Black	Black		1
Black		Black					0		
		0							2
Black			1
