

AQRE

Shade some cells black such that all black cells form one orthogonally connected area.

A numbered cell indicates how many cells in the region must be shaded black. In regions without a number, any amount of cells may be black (all cells may also be unshaded).

There cannot be more than three adjacent black or white cells in the grid.

5				3				1	
						2	1	2	
			6						1
3			2						
	3	0							1
						1		3	
1		0	2				0		
2			5						
2						3			
		1						3
