

## STRAIGHT CROSS

The aim is to place a number in every empty cell.

The numbers in every horizontal or vertical stripe of white cells must be a consecutive sequence of numbers without gaps.

Note: The number sequence can be in any order (for example 2-4-5-3).

9		3	2		5			4	
				6					5
	9			5		3			
		8			3			6	
6				6		6			
			6		9		6		3
		3				2			
	2		5			3			3
					1				
	4								5
