

STRAIGHT CROSS

The aim is to place a number in every empty cell.

The numbers in every horizontal or vertical stripe of white cells must be a consecutive sequence of numbers without gaps.

Note: The number sequence can be in any order (for example 2-4-5-3).

1					8			7	
	4		6			5			4
5					5			2	
7			4			7		3	
		5					7		
	8			9					3
4					4				
7					6		1		2
								4	
	5			3			6
