

STRAIGHT CROSS

The aim is to place a number in every empty cell.

The numbers in every horizontal or vertical stripe of white cells must be a consecutive sequence of numbers without gaps.

Note: The number sequence can be in any order (for example 2-4-5-3).

1		4		1			1		
						1			
	8				4				2
2				5		3			
	6		7		8				
		8		6					6
8		4	7						
	4								2
			3			5			
3				7	3
