

## ILLUSTRATION

The task is to shade some cells black.

A number in a white (black) cell represents the number of empty white (black) cells that can be seen from that cell (excluding itself from the count) until it encounters a black (white) cell or another numbered cell or the edge of the grid.

Note: A cell can be seen by another cell if they are in the same row or column. The color of numbered cells cannot be changed.

4						3	1		1
	3		1	1		4		3	
			3				2		1
		4			2			2	
	3						1		2
1			3		2	7		3	
				4					
1			1		5			3	1
	0			1			4		
			3		1				1
