

SUKORO

The task is to fill some cells of the puzzle grid with digits 1 to 4. A number inside a cell represents how many of its orthogonally adjacent cells (that is, vertically and horizontally connected cells) contain numbers in them.

Orthogonally adjacent cells must contain different numbers. All cells with numbers must be connected horizontally or vertically. Some numbers are already given in the grid.

	2		2				1
			4				
1		1					
						2	1
				2			
1			2			3	
	1
