STRAIGHT CROSS

The aim is to place a number in every empty cell.

The numbers in every horizontal or vertical stripe of white cells must be a consecutive sequence of numbers without gaps.

Note: The number sequence can be in any order (for example 2-4-5-3).

	9				5				
				6		2			
3		9			8		7		2
	2		4						3
4		2							
5			5			4		2	
		3		6				3	
2						3			
	5		3		3				5
				1		5		6
